AR
TapeDek® I

CARTRIDGE
TAPE
STEREO

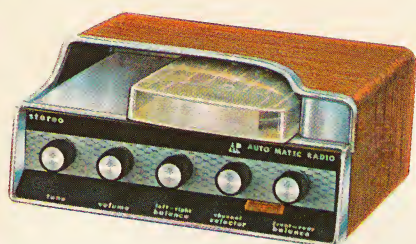

Plays 4-track, standard, pre-recorded magazine loading cartridge tapes. Cartridge selections range from classical to the currently popular and are available everywhere. No tape threading required — simply insert the cartridge into the player, flip the "on" switch and listen to a complete album of your favorite music without interruption. When tape is completed, TapeDek I shuts itself off automatically.

Complete stereo control panel permits fine adjustment for full balance and tone at all volume levels. Dual, high fidelity amplifiers produce 6 watts per channel of undistorted power over a frequency range of 50-15,000 cycles per second. Eight-transistor circuitry draws less than 2 amps at 12 volts. Electronically regulated motor virtually eliminates wow and flutter.

Compact Size:
3½" H x 9½" W x 8½" D

AR TapeDek® II

**ENDLESS PLAY
CARTRIDGE
TAPE STEREO.**

Plays 4-track, endless reel, pre-recorded stereo tape cartridges. TapeDek II is turned on automatically merely by inserting the cartridge into player. Musical selections continue to play and replay until cartridge is removed. Channel selector control allows instant pickup of a second complete album in the same cartridge. Electronically regulated motor and fly-wheel mean less than 0.3% wow and flutter. Dual, high fidelity amplifiers produce 6 watts of power per channel over a frequency range of 50 — 15,000 cycles per second. Uses less than 2 amps at 12 volts. Reversible polarity means TapeDek II operates on positive or negative polarity systems. Exclusive feature of TapeDek II is full range balance control for front and rear speakers as well as left and right.

Compact Size:
8½" W x 3½" H x 7½" D

TapeDek® STEREO

AR AUTOMATIC RADIO

Enjoy the music of your choice when you want to hear it... in your car, boat or home, through four full-frequency matched speakers. This easy to operate, all transistor unit plays conventional pre-recorded tape cartridges. Beautiful compact styling matches any decor. Typical mobile installation places the speakers, left and right — front and rear. Basic package includes self-contained dual stereo amplifiers, lockable under-dash mount, speakers with resonant cavity, chrome-plated grills and complete wiring harness assembly for easy, in-car installation.

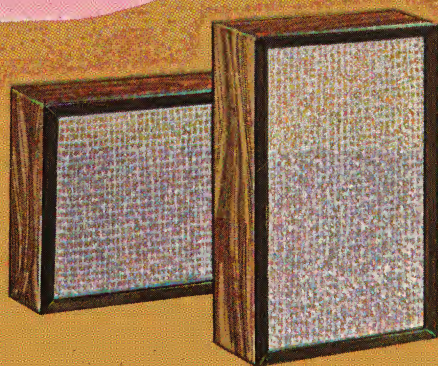

TapeDek®

Brings stereo into your home.

High quality at minimal additional cost. Remove the unit from its security mount in your car — add the power supply and matched speakers — and enjoy the same rich, full stereo music in the comfort of your home.

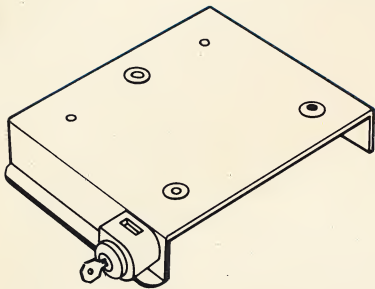

Handsome walnut enclosures, acoustically designed to match the out-put of all-transistor amplifiers, housing woofers and tweeters for full range volume.

Complementing the TapeDek®, this universal power supply completes your home installation. Operates on 110 volt household current.

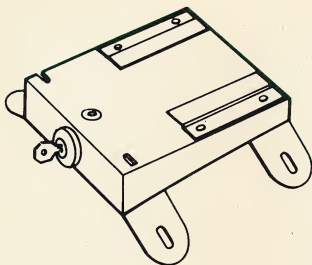

MOUNTING CRADLES

Additional mounting cradles for the Stereo TapeDek® are available as optional accessories. Equipped with a key-locked mechanism, your unit is protected against theft, yet provides for easy, quick removal by you.

Under-dash mounting bracket for that custom built-in look.

TapeDek I Model US-5450
TapeDek II Model DE-6361

Floor or console mounting where under-dash space is restricted.

TapeDek I Model FS-5451
TapeDek II Model FE-6360
